DETAILED ACTION

Double Patenting

1. Claims 8-15 and 19-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 9, 10, 12, 13, and 15, respectively of U.S. Patent No. 6,762,677. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 9, 10, 12, 13, and 15 of U.S. Patent No. 6,762,677 contains all the limitations cited in claims 8-15 and 19-27 of the present invention.

2. Claims 16-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 9, 10, and 15 of U.S. Patent No. 6,762,677 in view of Handfield (US 5,581,023). Claims 9, 10, and 15 of U.S. Patent No. 6,762,677 teaches all the limitations cited in claims 13-15 of the present invention, but still does not disclose a plurality of receiving channels. Handfield teaches the use of a plurality of receiving channels (col. 13, line 25-col. 14, lines 25, col. 15, lines 15-62, col. 18, lines 10-31). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to include a plurality of receiving channels to the system of claims 9, 10, and 15 of U.S. Patent No. 6,762,677 as taught by Handfield for the purpose of receiving various signal frequencies so as to distinguish the warning signals received from the alert device.

Art Unit: 2636

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Answers to Remarks

4. Applicant's arguments filed on December 28, 2004 have been fully considered.

Applicant's arguments with respect to claims 8-27 have been considered but are moot in view of the new ground(s) of rejection.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2636

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
